Welcome to NESPOS Poster Space

Poster Presentations are undoubtedly an integral component at conferences, meetings and workshops. However, in many cases posters are just temporarily available for the public. Within its innovative Poster Space, NESPOS collects poster presentations from conferences and workshops concerning archaeological and anthropological issues. For each poster a DOI (Digital Object Identifier) is provided to enable its citation. In addition, NESPOS arranges its digital preservation. Upload your poster presentation now to the NESPOS Poster Space for free and make your knowledge available and quotable for the scientific community. Beside uploading your own Poster with the uploading form, a conferences's complete Posterstock can be integrated into the Poster Space. In that case, feel free to contact us.
